DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 16-20 are rejected under 35 U.S.C. 102(b) as being anticipated by ASE Free Fall Simulators, provided by applicant as Exhibits A and B in the declaration of Don Kamis filed on September 2, 2004. Notwithstanding the statements made in the declaration, the brochures are printed publications, published more than one year before the effective filing date, and anticipate the invention. The brochures describe each of the limitations of the claims, such that one of ordinary skill in the relevant art would be able to create and use the invention.

Allowable Subject Matter

Claims 1-9, 12, 14, 15 and 21-23 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: Essentially, the arguments presented with respect to these claims are persuasive. The brochures and publications provided by applicant do not disclose or suggest each of the features of the invention. In particular, there is no suggestion of a plurality of air intake openings which face upwardly as recited in claims 1, 12 and 22, or

of the louvers and recirculation chambers of claim 14, r of the canopy which extends as recited in claim 21 such that air inlet openings are located above the canopy.

Response to Arguments

Applicant's arguments filed on July 27, 2005 have been fully considered but they are not persuasive. In particular, the arguments pertaining to the dissemination of the brochures also fail to overcome the determination that they are printed publications. The number of items distributed to the public does not determine whether the tem becomes a "publication". Rather, the test for determining whether an item is a printed publication is whether the item is accessible to the public. See *In re Klopfenstein*, 72 USPQ2d 1117 (CAFC 2004), *In re Hall*, 228 USPQ 453 (CAFC 1986) and *In re Bayer*, 196 USPQ 670 (CCPA 1978). In this case, by applicant's admission the brochures were provided to anyone who requested information. No steps appear to have been taken to preserve the secrecy of the contents therein, or to restrict dissemination of the brochures in any way. Even mailings to a relative handful of members of the public are sufficient to make the brochures printed publications. See MPEP 2128 and 2128.01.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hanawa discloses a free fall simulator.
